POLYURETHANE DISPERSIONS

Water-Based, UV-Curable Polyurethanes for Plastic and Wood Substrates

- An easy-to-use, alternative to conventional high solids UV-curable coatings
- Exceptional stain-, chemical- and mar-resistance properties
- Zero VOC content
- Coatings may be applied to plastic film or sheet stock, dried, formed, and then cured to produce the ultimate durable finish

Our technical support staff is available for consultation. Give us a call or send us an e-mail today.
