

JUST. ADD. VALUE.

At Sibelco, we don't just understand polymers, we understand how to deliver the performance requirements you need to meet.

Sibelco's polymer experts, work with you to understand your requirements and develop the right solutions.

With operations in more than 40 countries and global distribution and logistics networks Sibelco can help you to find solutions thus meeting your technical and financial objectives.

Please contact us at info@sibelco.com to discuss requirements. We're here to help.

We are helping customers worldwide to achieve superior performance results and meet financial targets.

HiFill® N
PROVIDES:

Improved PVC fusion rates

Color extension

Low oil absorption = minimal interference with other additives (eg Calcium Carbonate)

Crystalline silica deficient

Anti-sticking for tacky polymers and compounds

Purge compound

Gloss control

FDA approved for indirect food contact (up to 50% in the final products)

Improved weathering resistance, giving you cost savings from lower loadings of UV stabilizer

Low iron content = non-yellowing

Scratch & mar resistance

Dispersion / grinding aide

Supply assurance

Higher loadings while still maintaining contact clarity

Acid neutralizer

Increased body in clear flexible polymers - so it can easier pelletized
