

HIFILL[®] N

Nepheline Syenite Filler

HIFILL N delivers the performance you seek

HIFILL[®] N offers an optimum balance of physical and optical properties, ease of processing, regulatory compliance and cost effectiveness. This product is sustainably produced, urgently and reliably delivered, serviced and supported with our customers' continued growth and success in mind.

Available in ultrafine, precisely controlled particle size distributions for optimum performance, HIFILL N allows for formulation and processing cost reduction while not adversely impacting the products' physical properties and durability.

INCREASED
PERFORMANCE
AND LOWER
COSTS

- Color extension
- Low oil absorption = minimal interference with other additives
- Improved PVC fusion rates
- Non-reportable free crystalline silica
- Anti-sticking for tacky polymers and compounds
- Purge compound
- Gloss control
- FDA approved for indirect food contact (up to 50% usage level in the final products)

- Improved weathering resistance, translating into cost saving from lower UV stabilizer usage levels
- Low iron content = non-yellowing
 - Scratch and mar resistance
 - Dispersion / grinding aide
 - Supply assurance
 - Higher loadings possible while still maintaining contact clarity
 - Acid neutralizer
- Increased body in clear flexible polymers - easier to pelletize
