

PRODUCT SPOTLIGHT

Pergopak® M7 Organic Matting and Effect Agent

Pergopak® M7 is Huber Advanced Materials new and next generation ultra-fine matting and effect agent designed to meet the growing demand for PFAS-Free solutions in coatings and surface applications. It offers exceptional slip and surface protection while delivering favorable friction values equal to or even lower than PTFE, without the environmental concerns associated with fluoropolymers.

Features & Benefits

- Ultra-fine particle size ($d_{50} \leq 2.5 \text{ um}$; $d_{90} \leq 4.5 \text{ um}$) for thin-film applications
- Excellent matting effect, minimal impact on viscosity and compatibility in most systems
- Superior slip and friction reduction, values equal to or better than PTFE
- High mechanical resistance: scratch, polish and block resistance
- Pleasant, velvety surface feel
- FDA Compliant
